

1. How do I submit project?

Please use “submit” command on “cs.uml.edu”. Use the following command line:

```
submit wang COMP5610proj <your project files or directory>
```

to submit your project. For other homework submissions, change “COMP5610proj” to “COMP5610hwn”, where n is the homework number, e.g. “COMP5610hw1” for programming homework 1 submission.

For more information on “submit”, type “man submit” on cs.uml.edu.

2. What platform should I ensure my code works?

Linux is the platform we will compile your code with GNU C compiler.

3. How do I organize my files for submission?

You may organize your files in anyway you want. But do include a README file. Before you submit your files, create a directory and name it after your last name, put all your files you want to submit in that directory (nothing else), and then submit the directory.
